SPECULATIVE.

The Amount of Bond-Purchase Money Disbursed Yesterday Estimated at \$5,000,000.

The Money Market, in Consequence, Was Ensier-Stock and Security Dealings-Important Changes.

Special to the Gazette. NEW YORK, Aug. 25 .- The tender of bonds to-day was on a larger scale, and it was estimated that, including the payment of September coupous, the amount of money released by the government would reach nearly \$5,000,000. As a result the money market worked considerably easier. Early loans were made at 10 per cent., and the latter rate was advanced to 20 per cent. A plentiful supply of money was soon forthcoming, however, and the rate dropped to 4 and 5 per cent. and closed at 2, at which figure the last loan was made. Our market was very dull, but after an early depression ruled quite strong. Room traders who were disposed to sell stocks moderately at the opening or to await some definite news on which to base their operations later bought stocks to some limited extent. London also had a few purchasing orders in the market, particularly in Atchison, Louisville and Nashville, Union Pacific, Reading and St.

Sugar trusts were comparatively active, rather heavy after an early advance of 32. The price was depressed 132, but subsequently recovered a portion of the loss and closed at unchanged figures. New England also developed some weakness in the early dealings on limited trading, but rallled later. Lead trusts, although weak at opening, soon strengthened and rallied above Saturday's closing price on the advance of 1/4 per cent, per pound in white lead. St. Paul was fairly active, and on the announcement of an increase of \$13,476 in earnings for the third week of August, railied sharply from early depression. The market continued duil in the afternoon's trading, but further strength was developed particularly in 'he Vanderbilt's which, with the exception of New York Central, closed at substantial advance. As a rule the closing prices throughout were above Saturday's finals. Impor-tant net changes for the day were: Advances-Atchison, 16; Cleveland, Columbus, Cincinnatiand St. Louis, 1116; Canous, Chechiatiand St. Louis, 11/2; Canada Southern, 24; Burlington, 24; St. Paul, 25; Chicago gas, 25; Rock Island, 25; Lackawanna, 25; Lake Shore, 126; Lead trust, 35; Louisville and Nashville, 56; Missouri Pacific, 34; New England, 32; Oregon Transcontinental, 34; Union Pacific, 34p Wheeling and Lake Erie preferred, 1. Declines-Cleveland, Columbus, Cincinnati and St. Louis preferred; 14; Lake Erie and Western preferred, Reading, 14; Richmond and West Point, 14; Silver certificates, 14.

DALLAS.

Bad Wreck on the Fanta Fe Opposite Oak Citff-State Fair to be Opened by Gov. Francis of Missouri-

Special to the Gazette.

Dallas, Tex., Aug. 25 .- One of the worst wrecks that has taken place of late years, occurred on the Santa Fe, opposite Oak Cliff just on the Cedar creek crossing, at 2 o'clock Saturday. The train consisted of five cars loaded with merchandise, axle g rease, oil, clothing and whisky, and eight fiat cars. The trestle was broken and the cars and tender of the engine were piled in a heap. Joe Williams, the engineer, and his fireman jumped and were unburt. A brakeman jumped and struck the falling timbers, breaking his collar bone. A gang of men were at work all night Saturday night and all day yesterday clearing away the debris and repairing the damage done. TEXAS STATE FAIR AND DALLAS EXPOSI-

A letter to hand from the leader of the celebrated Thirteenth regiment band, Innes, which has been engaged to play throughout the exposition, encloses the names of the quartet of professional singers who will accompany the organization. These ladies and g-ntlemen are to take the leading parts in the cantata to be rendered by the Choral union, and to sing at other concerts. The prima donna, Senorita Enriquita R. de Ors, has but lately arrived in this country from Hayana, at which latter place, as prima donus of the opera company she took the place by storm. Mr. lines has concluded a forty weeks engagement with the senorits, and is loud in his praises of her personal beauty and singing, asserting that she will certainly create a s asation throughout the states. Signor Battistini, the tenor, comes to us with an European reputation second to none, and Mr. H. Bragau, the baritone aud Madame Rosa E. Janes, contralto are most excellent artists. This contingent is a strong one, and with 500 voices

The Choral union membership, both at town and country, is swelling, and the practices continue regularly. Parties at a distance who desire to join must not delay applying as it will soon be necessary to discontinue receiving entries, that all who have joined may have sufficient time to properly study the music.

The fair of 1890 will be opened by Governor Francis of Missouri, and Gov-

from the Choral union, the accompany-

ment of the band, and Piloher at the

ernor Bob Taylor of Tennessee will be on hand to take charge of the ceremonies on Tennessee day, thus we have up to the present no less than five state governors who have promised to attend the exposition, and among many other prominent public men, ex-President Cleveland, ex-Mayor Hewett of New York, J. C. In-man and Jay Gould. Most of these will at some time during the meeting address

the people in the grounds. The association is arranging for a wellknown circus now starring in Mexico, to be here and give daily exhibitious, and arrangements have been made for the return this year of Roltair's "Palace of Illusions, " which has been so extremely

popular during recent expositions.

The citizens of Decatur, Pecos City, Alvarado, Eddy and Roswell, New Mexico, are stirring themselves to send in to the fair proper exhibits, and repre-sentatives of the fair association report that throughout the entire district all are impressed with the importance to themselves of the State fair and en-

thuslasm on the subject prevails. Chairman Trice of the riding and ournament committee has in hand up to date ninty-six entries for the gentleman's riding contest, and more than thrible

opens. This riding competition will make up one of the nicest display and interesting events of the whole sition, for it is made a necessity that each competitor appear in fancy costume and masked. One does not want much imagination to depict what a pretty scene some hundreds of horsemen, handsomely mounted, and In every concervable costume, will constitute, while the fact that each will be endeavoring throughout the display to draw the attention of the committee to. himself by the curvettings and prancings of his steed will lend effect to the picturesqueness of the occasion. The judg-ing committee will consist of young la-dies, appointed by the fair management, and their decisions will not in any case be open to criticism, as the competitors will be heavily masked. In this competition flat English saddles will be required to be used. The "tilting at the ring'' tournament is steadily growing in favor, as it should, for it offers all the inducements for a display of fine horsemanship. Entries from all parts of the state are being received for both these competitions, and the large share of attention which the association is giving to equine sports and amusements seems to

be appreciated.

The Dallas telegraph college is an insti ution which has proven itself a credit to the city. For some years it has been doing a good work in preparing young men and women for a useful career, and now in the interests of the city and state where its success has been so made manifest it comes forward with the proposition to connect by wire the principal departments of the exposition, and to gratu-itously provide operators to attend at the different offices during the entire time of the exposition. The management have very naturally promptly closed with the offer, and telephones will consequently receive their death sentence. There will be a properly appointed telegraph office at the secretary's office, at the race stand and exposition hall, the lines forming a complete circuit, and from these main points of the exposition information will be transmitted in a continuous stream from morning to night to the secretary, who, with the aid of his numerous staff, will of course in turn present it through the press and other means to the public. The president of the college purposes the entire running of this telegraph department being in the hands of advanced pupils, and most certainly the association is to be congratulated upon this new departure, which will prove of considerable benefit not only to itself but to the 250,000 or more visitors who are ex-

Marriage is a Failure when the wife pines and wastes away. It is necessary in cases of female weakness and de-bility to give strength and restore health and vigor by the regular use of Oreole Female Tonic, woman's best friend.

GOVERNMENTS, STOCKS AND HONDS.

NEW YOLK, Aug. 25.—There was the same scarcity of slocks to-day that was such a feature hast week, and any attempt to buy at once advanced prices, and covering options were therefore small, and sbort interest remains at about the same figure, still Cleveland, Cincinnsti, Chicago and St. Louis became conspicuous in the last hour for strength, and others which displayed more than usual stiffness were Canada Southern, which closed 19, higher, Lake Shore 19, and Louisville and Nashville and Wheeling and Lake Eric preferred, each I per cent. The close was duil, but firm to strong, generally at small fractions better than first prices.

Railroad bonds showed the usual dulbess.

Government bonds - D all and steady to firm.

State bonds—Entirely neglected.

Daily Review. FORT WORTH, TEX., Aug. 25, 1991, In retail departments to-day there was an ex-ceptionally good business transacted—trading was good all day. Country buyers were quite numerous to-day. Wagons, laden with all kinds of produce, could be seen in all parts of the city, especially on courtyard square. Producers receive good prices for their stuff, and this, of course, makes business good. Wholesale dry goods and grocers, builders' material and hardware generally are all moving nicely now, both for the city and out of town. Great preparations are making in Fort Worth for a big fall trade—merchants anticipate a big business, and present indications, they say, are encourag-

ing.

There are no especial changes to note in quotations of any commodity, except a slight elevation in oats and hay.

Brazilian Sugar.

The Brazilian consul, in a letter to the New York Evening Post, states that "official data shows that the production of sugar in Brazil has been for the last ten years from 502,000 to 600.-000 tons a year. Our internal consumption alone is 800,000 tons annually.

"The truth is that Brazil can supply the entire demand of sugar in the United States with. tire demand of sugar in the United States with, in three or five years. Any of the states of Pernambuco, Bahia and Rio de Jameiro can at two years' notice produce 500,000 tons each of brown sugar. Even setting aside territory in the states of Goyar and Matto Grosso larger than the whole of France and Germany Rogether, the litteral zone of sugar production in Brazil extends from 4 degs. nor.h of the equator to 25 degs. south of the equator, with a development of 18 0 miles into the country of land unsurpassed for the culture of sugar cane.

of 100 miles into the country of land unsurpassed for the culture of sugar cane.

"The reason why the export of Brazilian sugar to the United States has not increased is to be found in those \$30,000,000 of duty. To pay two cents tax per pound on an article whose original price is less than the duty, and pay freight and insurance in competition with the West Indies sugar aiready at the doors of this market, is more than any product can do. But in the same way that such a duty explains the decrease of our exports to this market, the removal of the duty will explain the increase.

"The best proof of the vitality of sugar culture in Brazil is that, although it is not a paying industry at present, it produces one-third more than the culture of coffee, which pays very well; in fact, while Brazil produces 600,000 tons of sugar annually, she produces only 400,000 tons of coffee."
